AWAIS ANWAR

Full Stack Engineer | AI Agents | SaaS & Automation Platforms

m.awaisanwar@outlook.com | +92 314 625 5010 | Lahore, Pakistan | linkedin.com/in/awaisanwar12 | github.com/awaisanwar12

Summary

Full Stack Engineer with 7+ years building production systems across Node.js, NestJS, React, Next.js, React Native, Angular, FastAPI, PostgreSQL, MongoDB, Redis, BullMQ, and Socket.IO. Strong focus on AI agents, ATS/hiring workflow platforms, voice-agent automation, Web3 gaming and token staking systems, esports data intelligence, on-demand mobile apps, e-commerce suites, OCR/document intelligence, and logistics automation. Experienced owning frontend, mobile, backend, integrations, data models, async workers, and production observability end to end.

Core Skills

Languages: JavaScript, TypeScript, Python, SQL **Frontend & Mobile:** React, Next.js, React Native, Angular, Tailwind CSS, Material UI, Ant Design, AG Grid

Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, WebSockets, Socket.IO, TypeORM **Data:** PostgreSQL, MongoDB, Redis, Cassandra, Pinecone, embeddings, semantic search

AI/Agents: OpenAI SDK, LangChain, LangGraph, OpenAI Agents, RAG, MCPs, Vapi, Retell, Bland AI, OCR/document AI, prompt engineering, Langfuse, OpenTelemetry

Infra/Tools: Docker, Docker Compose, Nginx, Git/GitHub, Kafka, RabbitMQ, BullMQ, Linux, AWS S3, Playwright/browser automation, Liquipedia & HLTV data pipelines

Experience

Full Stack / AI Engineer **Sep 2025 - Present**

JASPI (Remote)

- Built a production-grade AI Applicant Tracking System with job management, candidate pipelines, resume parsing, interview analysis, candidate scoring, scheduling, notifications, and recruiter analytics.
- Developed microservices across auth, jobs, candidates, AI, notifications, scheduler/queues, and API gateway using NestJS/TypeScript, Next.js, PostgreSQL, Redis, BullMQ, Docker, and S3.
- Implemented OpenAI/LangChain-based AI services for resume extraction, job improvement, candidate evaluation, real-time chat, interview evaluation, and multi-agent workflow orchestration.
- Integrated Google/Microsoft/Zoom OAuth and scheduling, Slack/email/SMS notifications, JWT/RBAC/2FA security, caching, audit logging, health checks, and production monitoring.

Full Stack Developer **Sep 2025 - Present**

PowerMatch (Remote)

- Built full-stack features for PowerMatch, an AI-assisted construction hiring platform that helps companies review matched worker profiles by trade, experience, location, commute, availability, and role fit.
- Implemented candidate/company flows, profile and CV views, role-requirement capture, shortlist workflows, match-score explanations, screening status, and recruiter/admin dashboards.
- Developed frontend components, backend APIs, database models, search/matching workflows, validation, authentication, and user-facing hiring-product interactions.

Full Stack Engineer **Jul 2024 - Sep 2025**

The Game Company, UAE (Remote)

- Built and maintained gaming, Web3 staking, AI, and crypto products including token staking platforms, reward pools, prediction/staking dashboards, tap-to-earn games, online tournaments, admin CMS tools, and AI support agents.
- Engineered automated esports data pipelines and scrapers utilizing Liquipedia and HLTV to ingest live tournament brackets, match schedules, team rosters, and real-time match telemetry for gaming and prediction platforms.
- Developed full-stack product features across frontend, backend, staking and wallet workflows, admin dashboards, APIs, data models, automation workflows, and production support.
- Implemented RAG/semantic retrieval, structured outputs/function calling, assistant configuration, conversation history, async workers, WebSocket/WebRTC streaming, and Langfuse/OpenTelemetry observability.

Full Stack Developer **Dec 2022 - Jul 2024**

Zone Delivery Service, Dubai

- Built in-house web applications for 4PL logistics, merchant portals (MSP), rider operations (RMP), employee paperwork, delivery fleets, real-time tracking dashboards, and internal process automation.

Full Stack Engineer **Jan 2022 - Dec 2022**

Hyse Tech Private Limited, Islamabad

- Developed React/Next.js applications with SSR, reusable components, API integrations, performance optimizations, and production UI delivery.

Full Stack Engineer **Sep 2018 - Dec 2021**

Nested Logics Inc., Islamabad

- Built responsive React frontends, dashboards, business applications, API integrations, and production web features from design and product specifications.

Selected Projects

JASPI & AIHire (SparkAI) | AI Recruitment & Talent Platforms

NestJS, Next.js, PostgreSQL, Redis, BullMQ, OpenAI, LangChain, Docker, S3

- Built microservices ATS and AI recruitment suites covering job lifecycle management, candidate tracking, resume extraction, AI candidate scoring, interview scheduling, career portals, and recruiter analytics.
- Delivered Matchify and JobAI Pathfinder for automated skill-to-role matching, candidate shortlisting, and AI-guided career discovery across web and mobile surfaces.

On-Demand Mobile Apps & Consumer Marketplaces

React Native, Next.js, Node.js, PostgreSQL, WebSockets, iOS & Web

- Shipped native iOS and web applications including QueensGuard Laundry Services, Circle Society Community App, KGC Ride Hailing, CarWash Shine, On-Demand Maid Services, and ServiceSpark.
- Engineered real-time booking engines, geolocation dispatch, recurring service subscriptions, push notifications, and mobile-first customer workflows.

Prediction Markets, E-Commerce & Promotional Commerce Suites

Next.js, React, TypeScript, Node.js, FastAPI, Redis, WebSockets

- Built Opitra and Prediction Market trading software with real-time odds books, probability charting, outcome share trading, and portfolio tracking.
- Developed CommerceOS multi-channel retail and mobile shopping apps, GoKitchen cloud kitchen ordering, Smart Bazaar B2B restaurant supply, Ilmyst EdTech platform, and Fortunaze, Hazzi, and Winjoy promotional draw platforms.

Digital Health, Fitness & Community Platforms

React, Next.js, TypeScript, Node.js, REST APIs

- Delivered Pulse Elite Gym web portal and member mobile app, ForgeFit personal trainer and workout app, Polyclinic healthcare and e-pharmacy booking app, and AWOMP animal welfare and adoption app.

AI Voice-Agent Automation Suite

Vapi, Retell, Bland AI, Node.js/NestJS, Webhooks, PostgreSQL, Redis

- Built AI voice agents for trucking/logistics automation, medical reception, and educational reception workflows, replacing repetitive dispatcher/front-desk labor and reducing operational costs.
- Connected inbound/outbound call flows to backend tools through structured webhooks, transcripts, call summaries, CRM/TMS updates, confidence thresholds, and audit logs.

TradeOS (AI Freight & Compliance SaaS) & GLASC.IO (Fleet Analytics)

OCR, LLMs, RAG, Python, Node.js/NestJS, Kafka, Cassandra, RabbitMQ, PostgreSQL, React, Socket.IO

- Built TradeOS for shipping document OCR, missing-field detection, global customs checks, sanctions/restricted-party screening, and low-cost freight routing recommendations.
- Built GLASC.IO for real-time fleet telemetry, truck weight/position tracking, event detection, geofencing alerts, and logistics control-tower dashboards.

Education

BS (Hons.) Software Engineering **2018**

University of Engineering and Technology (UET), Taxila, Pakistan

Certifications

Google Business Intelligence | Google Data Analytics | Google Project Management | Developing Back-End Apps with Node.js and Express (IBM) | Meta Front-End Developer Specialization | Interactivity with JavaScript (University of Michigan) | JavaScript Intermediate & Frontend Developer React (HackerRank)
